ZOYA

Zoya 2.1

Release notes

TV through Home Assistant, several phones at once, Instagram messages in the background and a file converter.

New	4

November 2026

4 changes in this version

Designed and developed by **Tejas Munjal**

zoya-installer.onrender.com

New

- **TV through Home Assistant** when your TV is in Home Assistant (Android TV Remote, Google TV, Samsung, LG, Sony...), Zoya controls it through Home Assistant — no "Allow?" pop-ups or notifications on the TV, nothing to approve again. Apps, YouTube, links, buttons, channels and volume. Setting: TV & Devices → Control the TV through Home Assistant.

- Several phones at once, each with its own name (Tejas, Papa...). Zoya reads every new message from every phone and says whose phone it came on: "Tejas ke phone pe Rahul ka WhatsApp aaya...". WhatsApp, SMS, Telegram, Instagram, Messenger, Signal and more; codes are never read out. "Papa ka phone bajao" works too.

- **Instagram messages without keeping a window open** Zoya checks Instagram's unread badge quietly in the background and reads the inbox only when something new arrives. New 📸 button at the top: ON = say every Instagram message, OFF = silent (or say "Insta messages band karo").

- **File converter** "is PNG ko JPEG bana do", "video ko MKV me badlo", "Downloads ki saari PNG JPG kar do". Images, audio, video (fast lossless remux when possible), PDF pages to images, Word/PowerPoint/Excel to PDF, Excel ↔ CSV. The original file is never changed.

At a glance

What Zoya 2.1 can do

Talk and think	
Live voice chat in English, Hindi and Hinglish	✓
Offline backup brain (Full setup)	✓
Knows her creator, Tejas Munjal	✓
